A 3-year average was used unless otherwise noted

* Average yearly patient days includes swing bed patient days

~ If the total patient days for the community for one year falls 10% or more below 3-year average, that year is removed, and a 2-year average is used

** if beds in the community have a 3-year average occupancy of 95% or more, 5% is added to the total bed need

For any community in which swing bed days exceed 1825 bed days, usage should indicate that nursing home beds are needed. In 2018, these communities included the following:

Baker, Big Timber, Chester, Choteau, Culbertson, Ekalaka, Forsyth, Hardin, Roundup, Scobey, Superior, Terry, and White Sulphur Springs
